## Education

**Thapar Institute of Engineering and Technology**  
*B.Tech in Computer Science Engineering*

Aug 2023 – July 2027  
*Current CGPA: 9.55*

**Ryan International School, Ludhiana**  
*Class 12 (Senior Secondary Education)*

July 2023  
*Percentage: 96.7%*

## Experience

**Aigetai Pvt. Ltd.**  
*AI Developer Intern*

July 2025 – October 2025

- Developed an NLP-based comment enhancement system for a social media platform using transformer models, NLTK pipelines, and LLM APIs to improve comment quality and engagement.
- Collaborated on deep learning experiments and generative AI workflows, exploring text-to-video generation for social media content using diffusion-based models and Stable Diffusion techniques.

## Projects

**Agentic AI Sales CRM System** — *Python, FastAPI, React, MongoDB, LLMs*

GitHub

- Built an agentic AI CRM platform to automate lead enrichment, scoring, contact discovery, and personalized outreach using LLM-based multi-agent workflows.
- Implemented real-time job orchestration with background workers and SSE-based live log streaming to execute automated outreach campaigns and convert unstructured data into actionable sales leads.

**Physics-Informed CME Detection System** — *Python, Scikit-learn, XGBoost*

GitHub

- Developed a physics-informed ML system to detect Halo Coronal Mass Ejections using solar wind plasma data from Aditya-L1 SWIS with engineered domain-specific features.
- Trained a soft voting ensemble (Random Forest, XGBoost, Logistic Regression) and designed an end-to-end pipeline for CDF ingestion, event windowing, feature engineering, and real-time inference achieving 100% CME recall.

**Speech Emotion Recognition App** — *PyTorch, Wav2Vec2, Streamlit*

GitHub

- Developed a deep learning-based speech emotion recognition system using Wav2Vec2 embeddings and handcrafted acoustic features for emotion classification from audio signals.
- Trained on three benchmark speech datasets with data augmentation and deployed an interactive inference app achieving 89.1% classification accuracy.

**MarketPulse AI** — *Python, Scikit-learn, TF-IDF, Flask*

GitHub

- Built a Reddit-based stock sentiment analysis system analyzing 37K+ posts from r/stocks, r/investing, and r/wallstreetbets using TF-IDF and Bag-of-Words feature extraction.
- Trained and compared 5 ML models (Logistic Regression, SVM, Random Forest, Decision Tree, Naive Bayes) and deployed the best model in a Flask dashboard for real-time sentiment insights and BUY/HOLD/SELL signals.

## Skills

**Programming:** Python, C, C++, JavaScript, Go (Golang)

**Databases:** SQL, SQLite, Firebase Realtime Database, MongoDB

**Machine Learning:** PyTorch, TensorFlow, scikit-learn, XGBoost, Random Forest, Logistic Regression, CNNs, OpenCV

**NLP & LLMs:** HuggingFace Transformers, Wav2Vec2, TF-IDF, Bag-of-Words, NLTK

**Data Processing & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering

**Backend & Deployment:** FastAPI, Flask, Streamlit, REST APIs, Docker, Docker Compose, Render

**MLOps & Tools:** MLflow, DVC, CI/CD, Git, GitHub, AWS EC2

## Achievements

- Completed the Machine Learning Specialization by Stanford University and DeepLearning.AI, taught by Andrew Ng.
- Awarded **Merit Scholarship for three consecutive years** at Thapar Institute of Engineering and Technology for ranking among the top students in the Computer Science program based on academic performance.
